

User-Friendly 3D Point & Click Graphical Software

Inventory Manager is a module of JBT's SGV Manager Host Software and is used to control the JBT Self Guided Vehicle System, providing

- Detailed product identification and status
- Accurate product tracking
- Custom product put-away and retrieval “rules”
- Flexible integration in ERP systems
- Configurable inventory graphics
- User-friendly inventory screens
- An **Off-the-Shelf Product**, configured to match customer requirements

Features:

- ◆ Tracks up to 20 customer defined inventory attributes for each inventory type
- ◆ Separates product status into – normal, reject, hold and/or quarantine
- ◆ Accepts product introduced via barcode, PLC or directly from supervisory software
- ◆ Configurable for LIFO (storage lanes/push back rack) or FIFO (flow racks)
- ◆ Tracks in 3D – lane, depth, and storage height
- ◆ Dig out with automatic movement/storage of inventory

Inventory Manager Module

User-friendly inventory management functions within the Inventory tab:

- Inventory** view, modify, add and delete data within the inventory screen
- Location** name of the storage area in the facility – typically the lane
- Level** height of the product stored within the location
- Depth** storage positions as measured from the front or “head “of the lane
- Status** operational status of the inventory – normal, hold, reject, quarantine
- Product ID** unique load identification number
- Product** general product name
- Previous Location** location where product was retrieved from
- Store Time** time stamp when item was placed into storage
- Time at Location** the time the item has been in its current storage location
- Location Setup** view and modify inventory location configurations
- Requests** view and delete pending inventory requests
- Search** search for inventory by product, storage time, location, and details
- Reports** through SGV Manager reporting module
