

CUSTOM FABRICATION

A&B PROCESS SYSTEMS YOUR COMPLETE PROCESS SYSTEM PARTNER

At A&B Process Systems believes fabrication is all about integrity. The integrity of the design, the materials, the configuration and the integration are key in stainless steel fabrication. That is why we build, inspect and test our own components to precise standards using the latest technology in our Hygienic and ASME. Certified facilities. From processing vessels and holding tubes to dryers and heat exchangers to duct work and catwalks, we build it all. When it comes to stainless steel fabrication, you can count on integrity with A&B Process Systems.

CUSTOM FABRICATION

A&B PROCESS SYSTEMS YOUR COMPLETE PROCESS SYSTEM PARTNER

PLATFORM-STAIRWAY

Custom fabrication of hygienic, high purity and industrial equipment using

- 304L/316L stainless steel
- Hastelloy and other special alloys

ANDIZING TANK

A&B's internal mechanical designers and process engineers provide enhancements in performance and durability to each custom job

Finishing capabilities from glass beading to mirror like finishes

A&B's materials management practices maximize throughput of the four state-of-the-art manufacturing plants

SPRAY DRYER CHAMBER

Design and fabricate stainless steel tanks to 3-A, USDA, cGMP, ASME (U&R), BPE, FDA, and API standards.
