

Hybrid Layer Pad

Add rigidity and longevity to your layer pad life!

General Description

JBT is pleased to offer a new, specially formulated hybrid silicone/aluminum layer pad. Over two years of research went into finding the perfect formulation that resists sticking to the bottle cap when it is processed, while retaining great adhesion to the aluminum backing sheet.

The silicone provides a soft surface that will not scratch any retort rated lithograph or lacquer on a bottle caps. The soft silicone also allows for slight height differences to accommodate tolerances within custom bottle design. The aluminum backing plate provides corrosion resistance and strength while remaining lightweight.

Application Information

Features

Fits basket sizes for the:

- 1400
- 1500 SuperAgi

Layerpad size:

- 37.6" x 37.6" x 0.23"

Aluminum backing plate

Specially formulated silicone rubber, works with retortable bottle cap lacquers

16 suction cup pickup points for automated loading

Benefits

Provides flexibility for bottles with small height variations

One one layer pad required versus typical separate silicone and metal layer pads

Rigid and corrosion resistant

Will not scratch lacquer on bottle caps

JBT LIQUID FOODS

FRESH PRODUCE TECHNOLOGIES | FRUIT AND VEGETABLE PROCESSING | SECONDARY PROCESSING | ASEPTIC SYSTEMS | FILLING AND CLOSING | IN-CONTAINER STERILIZING | HIGH-PRESSURE PROCESSING | POWDER PROCESSING | TUNA PROCESSING
