

## Upgrade Kits

### Replace position indicator Alfa Laval valves

JBT SF&DS Amsterdam is globally providing high quality filling systems. These systems are known for their reliability and durability. The uptime of JBT SF&DS systems will provide our customers the competitive advantage over their competitors. It is our goal to improve this advantage in any way we can.

#### Is it open?

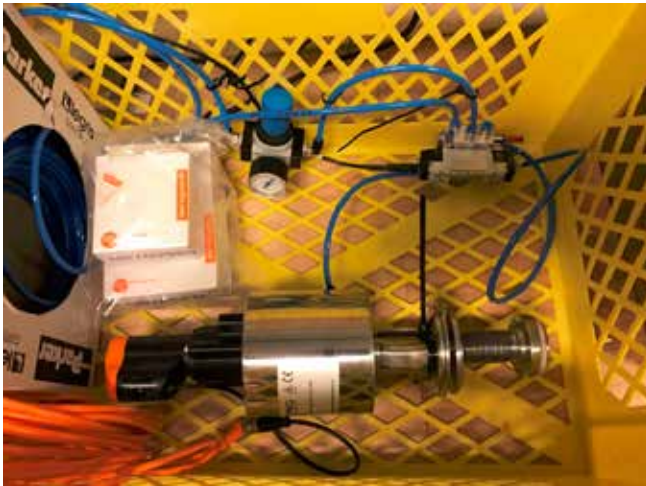

Sometimes the Inditop magnet connected to the actuator shaft will fail. This will result in incorrect feedback of the valve position.

A new design position indicator is selected and tested. Lifetime of the new component is multiple factors better than the current design, cost is lower and dimensions are smaller.

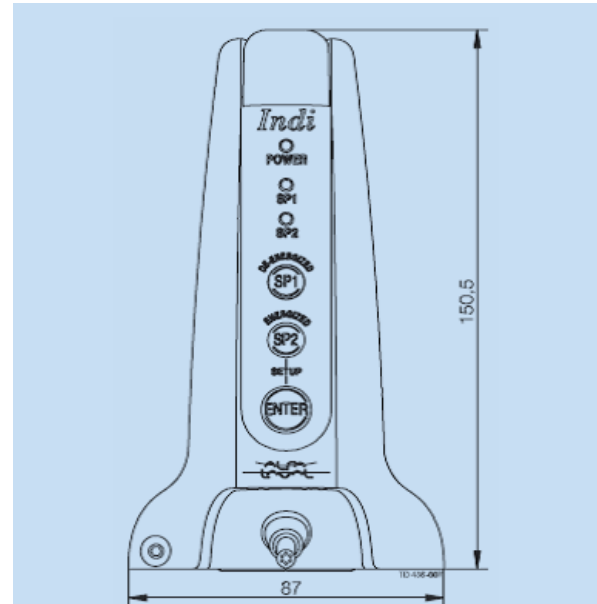

*The installed position indicators will be replaced by the new design and new cables will be connected. This can all be done in a couple of hours. The result will be less unexpected disruptions of production and cleaning cycles.*

Test setup:

Current Inditop:

New position indicator:

*If you are interested in the new position indicator, contact your Area Customer Care manager for a proposal.*

Please contact your JBT Customer Care manager for more information.
