

PRoCARE[®]

Service Agreements

Working together for better results

Stay one step ahead

Our PProCARE® service contracts are built to maximize your uptime and financial predictability, with the goal to reduce your total cost of ownership

Keeping production running without disruption is key to a successful business. Loss of production means loss of sales and profit. With increasing capacity there is no room for unplanned downtime. Proactive, professional, preventive maintenance significantly reduces your downtime. That's what PProCARE is all about.

PProCARE from JBT gives you scheduled preventive inspections and maintenance of your equipment, along with a range of other benefits — minimizing unexpected and budget-shattering costs for reactive maintenance.

Further it's designed to give you a predictable monthly cost based on actual equipment use for each machine it covers, and the simple administration that comes with is a plus.

“Being proactive means being reactive, ahead of time!”

Control your costs

- Preventive maintenance based on unmatched knowledge and expertise
- Smart, purposeful and timely inspections are the core of effective preventive maintenance
- Add training, original spare parts, foodgrade Formula lubricants and certified detergents
- Prevent machine breakdown
- Eliminate big jumps in your maintenance budget

Improve your performance

- PProCARE is about making sure your equipment performs to its best advantage
- Optimize your production and minimize downtime

PRoCARE Options

Food-grade Formula lubricants

Equipment function and wear are directly related to your choice of lubricant, which is why the specially developed lubricants from JBT - tested and proven under the most severe operating conditions - are recommended to be included in the agreement, according to a pre-agreed lubricants list and based on yearly consumption quantities.

Certified detergents

Protect your investment and assure food safety at the same time by making sure you are using the correct cleaning agents for your specific equipment and application. Include our certified detergents to your agreement. This will include setting up the correct cleaning procedures and selecting the correct cleaning agents and concentration for your equipment.

Uptime kits

Our uptime kits are developed to assure you have the most critical parts on stock should anything happen.

Emergency service

A well maintained machine shouldn't stop, and if it does, we will do our utmost to get you up and running again. That's why phone support and on-site emergency service are available.

Keep it running

- Avoid costly production stops by working proactively
- If your equipment stops - priority phone support and on-site emergency service are available - we will do our utmost to get you up and running again

Assure a good night's sleep

- Our experts help you coordinate everything
- We help you predict machine failure
- We provide detailed inspection reports followed by recommended actions to stay one step ahead
- In short - let us worry about keeping your equipment running at its best, while you get a good night's sleep

At your service

PRoCARE is about making sure your equipment and production performs to the optimum level, while minimizing unplanned downtime. It's a maintenance and operational partnership, which helps you to implement planned maintenance budgets that will save you money in the long-term.

While you focus on growing your business, we will focus on keeping your equipment running at its best.

Get in contact with your local JBT office to set up your PRoCARE agreement or to let us know how we are doing. Help us develop our offering - we are always interested to hear from you!
