

TIPPER TIE™

PTNV

Table Clipper

The solution for pressure packing whole muscle products

Press Tie PTNV

Area of Application

The Clippers of the PTNV family are used wherever an absolutely secure closure is required. Machines of the PTNV range are suitable for pressing and sealing meat products in pre-fabricated casing sections. These Clippers are also ideal for products such as rolled and boiled ham, bacon, turkey or chicken. The pneumatic clamping device ensures high pressure and thus ensures tight filling. In this way, air pockets are reliably prevented. The end product is provided with a firm, even structure and an excellent cut appearance.

Design

The Clippers of the PTNV family consist of stainless steel and high performance food safe plastic, they meet the latest safety and hygiene requirements defined in the various standards. e.g European machinery directive and clip machine standard EN13885.

Equipment versions

- A knife ensures straight ends with a good appearance
- A maintenance unit ensures clean operating air with the right pressure; this reduces maintenance costs.

Advantages

- Low lifecycle costs due to robust design
- Service and maintenance costs are minimal
- The machine achieves highest standards of hygiene and safety
- Compact design suitable for even small production areas
- The machine withstands the toughest permissible cleaning methods
- Hygienic design, smooth surfaces, stainless materials for quick and easy cleaning
- The high closure speed supports the ergonomic workflow of the operator
- Stepless adjustment of clip shaping ensures optimum closure for every package
- High resistance against mechanical influences, through use of stainless steel, increases service life
- Low noise level for pleasant working environment

Specifications	PTNV 200	PTNV 400	PTNV E 500
Caliber	100 mm	160 mm	160 mm
Clip Range	G175-G250	370-425	E510-E540
Air Pressure	6 bar		
Air Consumption	7 Liters		
Weight	30 kg (66 lbs.)		
Dimensions L x W x H	1300 x 300 x 900 mm		

Sound pressure level: LpA=79dB(A) (as per EN ISO 11204)
