

JBT Certified Lubricants

# Food-grade Formula 8009

Antiwear extreme high-temperature H1 food-grade penetrating aerosol spray

You chose Double D equipment from JBT for your process line because of their proven performance – in extended production, under heavy loads, and at extreme temperatures.

## Your single source

Choose our food-grade Formula equipment greases for the same reasons. Protect your food processing investment at the same time you simplify your supply of a complete range of equipment customized and safety-certified greases.

## What's unique with Formula 8009 grease?

- Penetrating aerosol spray developed and tested to fit JBT's Double D equipment.
- Perfect "cocktail" of pourpoint and viscosity.
- JBT can offer a PROCare service agreement package which provides all the necessary greases.

# Food-grade Formula 8009

## Description

Formula 8009 is a penetrating aerosol spray based on synthetic hydrocarbons (??) specially developed for JBT's Double D equipment. The aerosol spray answers the stringent food safety- and hygiene requirements and temperature extremes of the food processing industry. Designed to soak in and penetrate the smallest cracks and crevices to loosen galled or seized parts or fasteners. The Formula 8009 aerosol spray supports safe, smooth operation and maximized operating uptime. It does not have any noxious odour or staining colour, making it ideal to use when people are present. Choose the JBT Food-grade Formula 8009 spray to extend the running hours of your equipment.

## Formula 8009 Features

- High Temperature Performance
- Rust Inhibiting
- No Noxious Odour
- Soaks in and Penetrates Rapidly
- Effective Lubricity throughout the Full Operational Temperature Spectrum
- Meets Food-grade H1 Requirements for Incidental Food Contact

## Benefits for your application

- Improved lifetime of parts - once it has loosened pieces or parts, they remain lubricated for the next action.
- Lower maintenance costs.
- Improved uptime since it acts fast so production is not held up.

Don't jeopardize your production by using non-recommended greases because, in the end, they can cost you more! Experience shows that they can lead to expensive

equipment failure and lost production time.

The European Union now applies ISO standards that require food processors to use greases that are completely harmless to the food product's consumer, if cross-contamination occurs. JBT can give you that certification today. All our greases are USDA H1-authorized, and come with an NSF registration number.

Please contact your JBT representative for detailed specifications and price information for each product, and to learn about greases for our other applications.

As always, we stand behind what we sell. One call gets it all.

## Technical Data

NSF registered 141438	Food-grade H1 for incidental food contact
PROPELLANT	Propane, Butane
Flashpoint	- 94°C
Mixture - Flashpoint	138°C
Spray Pattern	Stream
Texture	Very Light Oil Film
Colour	Clear Straw
Odour	Slightly Nutty
MICRONOX®	Yes
Containers	312 g
