

PLF International Upgrade Kit

Nozzle Tube Connections

Quick disconnect option available

Having trouble removing vacuum pipes from your filling heads?

We at PLF have a solution.

These quick release bayonet fittings are very easy to release, especially when the operator has rubber gloves fitted. They are fitted to the clamp vacuum line, so every time you need to change format size, just press the button on the fitting, release the tube and remove the filling head. No more struggling removing pipes. Made from high quality Stainless Steel, so no possibility of contamination. If you are interested in this upgrade, give us a call.

Benifits

- ✓ A positive connection, so no more ill fitting vacuum pipes.
- ✓ From a small outlay, will save you time and money in the future.
- ✓ Easily installed by you own Technicians.
