

## Upgrade Kits

### Level 1 training Rotary Filler

#### Get your skills on a higher level

JBT is committed to increase the base knowledge of all our customers to a level that they can operate and maintain their own equipment. Therefore the Level 1 basic training for the rotary filler is a training that should be followed by every operator and maintenance engineer involved with a SF&DS JBT Rotary Filler.

#### Learn

1. To maintain the filler
2. To trouble shoot the filler
3. To operate the filler
4. Generic principles of the filler work
5. To read the manual and P&ID

#### Theory and practice

The training is a 50/50 combination of class room theory and practices in and around the machine. This ensures all operators and maintenance engineers will learn the required skill-set, without dosing off in class. The trainee will have the opportunity to ask practical questions to the trainer when they are working with the machine.

#### Exam

The training will be completed with an exam to test the trainee's knowledge

#### Material

The trainee will receive the following:

- Reader
- Manuals
- Certificate
