Hydraulic unit for the sterilizer

Better Control of your homogenization pressure for greater precision!
Easy, quick and precise adjustment of homogenization pressure with a hydraulic unit

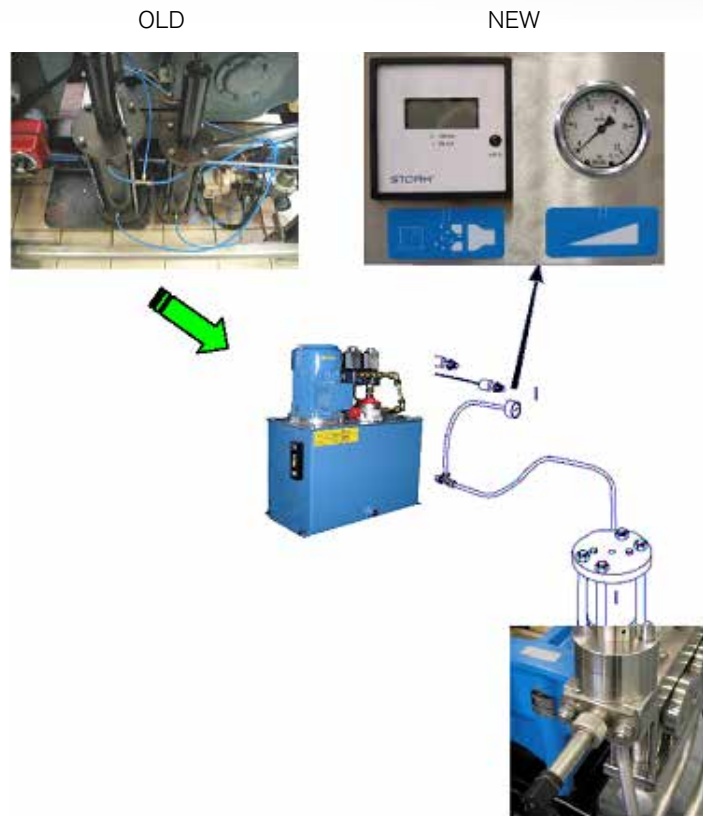

Every JBT SF&DS customer wants an easy and quick changeover or adjustment of their homogenizer, when changing over to another product run.

JBT SF&DS has developed a new hydraulic system to replace the old pneumatic-hydraulic booster unit that is used to adjust the homogenization pressure.

This enables quick adjustment, is reliable and needs less maintenance.

Advantages of a hydraulic unit

- Rapid adjustment of the homogenization pressure
- Less maintenance
- Reliable
- Greater stability of homogenization pressure
- Easier integration for automatic homogenization pressure control
- Digital pressure indicator
- Auto option high – low alarm with LED indicator
- No risk of hydraulic oil or air leakage, resulting in longer production time.

Please contact your JBT customer care manager for more information.
